DETAILED ACTION

Applicant's amendment and arguments filed on 13 February 2007 have been fully considered. Claims 1-11 are therefore allowed with the additional limitations included.

Examiner's Statement Of Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or reasonably suggest the currently amended section, where a switchable element includes a surfactant for affecting the surface tension to the lower magnitude of the voltage required to control the switchable element in combination with all of the claimed limitations. The prior art of record, although teaches two fluids having the claimed properties in a switchable element, does not teach a surfactant in any of the fluid bodies. Although prior arts of record do teach the addition of a surfactant in liquids for reducing surface tension, the prior art does not teach the surfactant to lower the magnitude of voltage required to control the switchable element in combination with all of the other elements.

Close prior arts of record are U.S. Patent Application Publication 2002/0037130 to McBride et al and U.S. Patent Application Publication 2003/0012483 to Ticknor et al, relied upon in the rejection set forth in the previous Office action, mailed 01 December 2006, paper number 200611, and now withdrawn.

Therefore, claims 1-11 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
